Document 2: JP 10-159906 A (Aisin Seiki Co., Ltd.), 16
June 1998

The invention set forth in claim 1 does not involve an inventive step in the light of documents 1 and 2 cited in the international search report. Document 1 sets forth an engine balancer device provided with an oil discharge hole, wherein a balancer housing is constituted by joining an upper housing and a lower housing at their mating faces, and the balancer housing is tilted in such a manner that the height of the mating face on one side is different to that on the other side. Moreover, it would be easy for a person skilled in the art to employ the balancer housing set forth in document 2 (paragraph [0020]), wherein the oil discharge holes are formed on the upper part in order that there is no impact on oil outflow, in the engine balancer device set forth in document 1.

The invention set forth in claims 3 and 5 does not involve an inventive step in the light of documents 1 and 2 cited in the international search report. Document 1
